Highest rates by district

District	Incidents	Population	Per 100,000
1. Bandarban	15	0.48 m	**3.12**
2. Pirojpur	27	1.20 m	**2.25**
3. Jashore	68	3.08 m	**2.21**
4. Lalmonirhat	26	1.43 m	**1.82**
5. Jhalakathi	12	0.66 m	**1.81**
6. Patuakhali	27	1.73 m	**1.56**
7. Thakurgaon	23	1.53 m	**1.50**
8. Moulvibazar	31	2.12 m	**1.46**
9. Joypurhat	12	0.96 m	**1.25**
10. Dhaka	178	14.73 m	**1.21**

How to read this map. These are reported incidents, not all crime: rape is widely under-reported, and differences between districts can reflect reporting and press coverage. Low rates do not show that a district is safer. The source file gives no year or source, so the rates compare incident counts from an undated file with 2022 populations and work only for comparison, not as true incidence.

Points mark the centre of a named place, not an exact address, and some positions were corrected by hand. Hotspots use the Getis-Ord Gi* statistic on incident counts (10 km grid, 20 km radius, 5% false discovery rate); edges are smoothed and approximate. Regional hotspots change with the radius. Classes use natural breaks (Jenks). Totals only: no victim or case can be identified.

Data: Bangladesh-Crime-Dataset.csv (duplicates removed). Boundaries: geoBoundaries (CC BY 4.0). Rivers, lakes, neighbouring countries: Natural Earth. Population: BBS Census 2022. Coordinates: WGS 84 (EPSG:4326), plotted with a fixed aspect at 23.7°N.
